CAREER OBJECTIVE

Recent Electronics and Communication Engineering graduate with strong technical abilities and a passion for solving real-world problems. Eager to learn new technologies and apply my skills in software development and emerging tech domains

EDUCATION

B.Tech - Electronics and Communication Engineering **2021 - 2025**

Sri Manakula Vinayagar Engineering College - Madagadipet

CGPA - **8.66**

Higher Secondary Certificate **May - 2021**

Petit Seminaire Higher Secondary School , HSC - Computer Science

Percentage : **91.53%**

Secondary School Leaving Certificate **Mar - 2019**

Petit Seminaire Higher Secondary School , SSLC

Percentage : **91.4%**

AREA OF INTEREST

- Web Design
- Software Development
- Database Management

TECHNICAL SKILLS

- **Front-end & UI/UX:** Figma (Wireframing/Prototyping), HTML, CSS
- **Programming & Database:** Java, MySQL, C
- **Tools & Platforms:** GitHub, Docker, n8n, MS Office, VS Code, Power BI, Eclipse

SOFT SKILLS

- Time Management
- Leadership
- Communication
- Quick Learner

PROJECT

BUS TICKET RESERVATION SYSTEM (JAVA)

- Developed a Java-based Bus Ticket Booking System with features for seat reservation, date-wise availability checks, and bus info display.
- Designed modular OOP classes for Bus and Booking with dynamic data handling using ArrayLists.

AUTOMATED PROMPT GENERATOR (AI Workflow Integration using n8n)

- Built a Dynamic Prompt Generator in n8n to turn ideas into clear prompts.
- Created an interactive form that adapts to user inputs.
- Automated ready-to-use outputs for tasks like roadmaps, images, and proposals.

UI PROJECT: MOVIE TICKET BOOKING APPLICATION (FIGMA)

- Designed a visually rich mobile app interface for browsing and booking movie tickets.
- Used bold posters, genre tags, and ticket-style layouts to create a cinematic feel.
- Prioritized user flow from discovery to booking with a clean and engaging UI.

MINI-PROJECT

AUTOMATED WATER DISPENSER USING ARDUINO UNO (Arduino IDE)

- The ultrasonic sensor measures the water level and sends data to the Arduino Uno. The Arduino controls a 5VDC relay to turn the water dispenser on or off based on the sensor data. The system continuously monitors and adjusts to maintain the correct water level.

INTERNSHIP

MANATEC ELECTRONICS PRIVATE LTD.

Feb 2024

- Assisted in software installation and configuration for automotive diagnostic systems, ensuring proper setup and functionality. Worked on mechanical assembly tasks, including device setup and alignment, contributing to the efficiency of diagnostic tools.

CERTIFICATIONS

- **EduSphere** – Foundational Programming in Java Web Development (3-month course)
- **CISCO** - CLA: Programming Essentials in C
- **AWS** - Academy Machine Learning Foundation
- **Deloitte** - Data Analytics job simulation
- **Upgrad X Microsoft** - Gen Ai Foundation

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

- Led a team of three as a team leader in planning, coordinating, and executing the final year project, ensuring timely completion and efficient collaboration.
- Organized an Interdepartmental event "Innovation Ignite" .

HOBBIES

- Designing interfaces on Figma and exploring UI/UX trends
- Analyzing tech videos and reading blogs about gadgets and automobiles
- Photography and editing
- Reading business books
